Henrietta Lacks has immortal cells and still has some alive to this day that have made miracles. Born in Roanoke on J. Aug. 1920, Honrietta Pleaant Ilved here vihr nettatives after here mothere 1924 death. She mæried Dærid Lackv in 1941 and. Ilke manv ofter Artifena Americaan. moved to Baltimore, Md. for wartline employment. She elide of occurical cancer on 4 Oct. 1931. Cell tissue was removed without permission (as usual then) for medical research. Her cells multiplied and survived at an extraordinarily high rate, and are removed overlevide as the "Hela line," the "gold standard" of cell lines. "Hela line," the "gold standard" of cell lines.

HENRIETTA LACKS (1920-1951)

She died from cervical cancer that grew rapidly she had a dime sized tumor on her cervix from her having abnormal cells.

Here's a video to watch to give you more knowledge on henrietta https://youtu.be/22IGbAVWhro

She never knew the doctors took her cells neiter did her family, they had no consent and gave them no money. She changed her name from Henrietta Lacks to Helen Lane.

Her cells are still used in modern medicine today like most cancer medicines. Theyre known as HeLa cells.
